# Perdomo Family

*World Reach Missionaries in Honduras, Central America*

*This 2021 has begun with new expectations and opportunities to serve the Lord and His people. We thank God for each of you and your support for the work that the Lord has entrusted us. We pray that this year will be a great blessing for each of you and your families. Grace to you and peace from God our Father and the Lord Jesus Christ. We want to share recent details of the occupations of each member of our family. We hope they bless you richly.*

## Alan

After months and months of hard work and research, I have the privilege to announce that I have turned in the first copy of my doctoral dissertation. Praise the Lord! One of my advisers said that it was remarkable for me to finish this work amidst this special and unique circumstances with the quarantine and a pandemic. Having completed this step, I just only have a couple of smaller steps to complete my PhD degree. We rejoice as a family in completing this goal that will be a tool to serve the Lord in a more effective way. Thank you so much for your support and prayer in my behalf. Please, pray for me, especially around March 11<sup>th</sup> and 12<sup>th</sup>, since I will be taking my general exam in those two days (8 hours each day).

## Dorisy

God has allowed us to use the quarantine time to give impulse to a prayer ministry for families and individuals, using WhatsApp as a communication medium. Each member of a group of five sisters from our church let the others know when there is a special need and they make a group call to communicate with the person in need (normally a lady). We pray and encourage her using Bible texts and words of wisdom and love. Praise the Lord for this ministry. Also, I have been asked to write a book on “How to Pastor Women Effectively” for the Joy of Service Women’s Ministry. Thank you for your prayers and support on our behalf.

## Kristian

For the grace of God, I have started my final graduation project, which consist in a machine that they can put in the entrance of stores and malls. It will measure the temperature of each person, then will release the proper amount of sanitizing gel for the hands, and will count the number of people inside of the store, to meet the standards of biosafety. My counselor said that this has a good potential to be used by many companies. Please pray, so I can finish strong my college career, and for God’s perfect plans for me.

## Kyrien

I have been in school via Google Meet, using our regular schedule. As you can imagine, at the end of the day, I am tired. The upside of this, is that I have the opportunity to ask my parents about some perspectives and opinions from my classmates and teachers. They help me to see a biblical perspective on some subjects. I wanted to share with you the joy of my sixteenth birthday. We had a virtual meeting with my grandmother, my aunt and Kristian who live in San Pedro Sula. We had a special food, which my mom reheated, just for biosafety, and a chocolate cake. Then, we had a virtual movie session with several friends and then I attended the youth service at church. It was a special day, even in the midst of this crisis.
